Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-29, drawn to a method for thermal insulation.

Group II, claim 30, drawn to a flowline or pipeline thermally insulated by a method of claim 23.

Group III, claims 31-33, drawn to a cross-linkable formulation.

Group IV, claims 34-36, drawn to a process for producing an insulating gel.

Group V, claims 37-38, drawn to an insulating gel.

Group VI, claims 39-41, drawn to a flowline or pipeline thermally insulated by a method of claim 37.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical feature for the following reasons: the special technical feature common to all the independent claims is a polysiloxane gelling agent of claim 8, which is shown to be anticipated by Frances et al (FR 2800380A). Frances et al describes a cross-linkable polysiloxane for the use in sealants of claimed formula (See US 6,743,883 of the same patent family, column 1, line 19; column 6, line 65 to column 7, line 55). For these reasons the unity does not exist between the groups of claims.

Lack of Unity - Species

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species of Group I

(A) This application contains claims directed to more than one species of ***insulating liquid base***: (i) saturated or unsaturated, cyclic or non-cyclic aliphatic hydrocarbon bases (Claims 2-6); (ii) aromatic hydrocarbon bases (Claims 2-6); (iii) mixtures of aliphatic and aromatic fractions (Claims 2-6); (iv) aliphatic and aromatic alcohols (Claims 2-6); (v) fatty acids, vegetable oils and animal oils (Claims 2-6); (vi) halogenated compounds (Claims 2-6); kerosene (Claim 7).

(B) This application contains claims directed to more than one species of ***gelling agent*** comprising: (i) polyorganosiloxane terminated by hydroxyl functions and at least one silane containing alkoxy functions or carboxylate groups (Claims 8 and 11); (ii) two functionalized polysiloxanes: a resin A containing vinylsilane functions (Si-CH=CH_2) which may be grafted; and a resin B containing hydrosilane functions (Si-H) (Claims 8, 12-14).

Applicant is required, in reply to this action, to elect a *single* species from ***both*** groups (A) and (B) to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify **the claims readable on the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
